

(a) PVC-based mapping platform.

(b) Example field map output from MRI fringe region.

Figure 1: PVC-based magnetic field mapping platform. Used for spatial B_0 and ∇B_0 measurement. based on design from Ferreira, et al. (2017) [?, ?].

Panel (a) shows the full assembly. Panel (b) highlights the upper ring designed to secure the pendulum string. Panel (c) shows the lower ring containing the slit used to align a 1cm-wide ruler for displacement measurements.

This text will wrap around the figure on the right side of the page, continuing until the bottom of the figure is reached. Additional paragraphs will continue wrapping naturally. This text will wrap around the figure on the right side of the page,

Figure 5: Figure with text wrapping.

Figure 2: Temperature dependence of the reaction rate for catalyst A. Error bars represent standard deviation from three independent measurements ($n=3$).

(a) Condition A

(b) Condition B

(c) Condition C

(d) Result A

(e) Result B

(f) Result C

Figure 3: Comparison of experimental conditions and their results.

(a) First subfigure

(b) Second subfigure

(a) Voltage readings for Rod5 (Glass) with up to 750 mg of water in increments.

(b) Voltage readings for Rod7 (Clear Plastic) with up to 800 mg of water in increments..

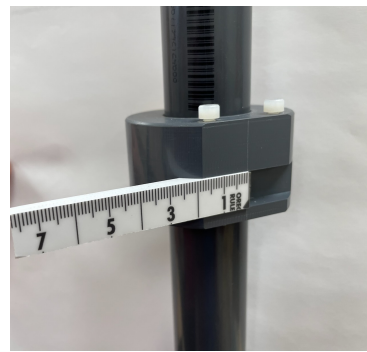

Figure 8: Trial examples for Rods 5 and 7. Both of them showed inconsistency across trials showing minimal to no change in voltage with weight added.
